IN THE CLAIMS

The amended claims are as follows. Claims with insertions and deletions are shown in
Appendix A.

- C1
1. A process for characterizing DNA comprising a step of isolating nucleic acids, wherein the step of isolating comprises the steps of:
 - (a) contacting a biological material that contains DNA with a solid support treated with a lysing reagent wherein the solid support has not contacted the biological material at the time of treatment;
 - (b) treating the biological material that contains DNA with a DNA purifying reagent;
 - (c) purifying the DNA from the remainder of the biological material; and
 - (d) analyzing the purified DNA,

wherein the lysing reagent is bound to the solid support and any unbound lysing reagent is
